

Propagation Model Calibration of Your Wireless Network is Required by the FCC's Broadband Data Collection (BDC) Program by September 1st

The new FCC's Form 477 requires both mobile and fixed Wireless Carriers to perform Propagation Model Calibration for all 3G, 4G, and 5G Networks with Drive Tests, On-The-Ground Testing or quantifiable Real-World measurements.

4G Unwired can help you file on time

Our engineers have developed a cost-effective process

The deadline for this filing is September 1, 2022 for the June 30, 2022 update. Call or email us at:
